SUMMARY

Data Engineering Intern with hands-on experience in scalable ETL pipelines, real-time streaming systems, and cloud-native analytics platforms using PySpark, AWS, and Databricks. Strong foundation in Machine Learning, data analytics, and distributed data processing with interest in building intelligent data-driven systems.

EXPERIENCE

Data Engineering Intern — Infocepts

Jan 2026 – Present | On-site

Built end-to-end ETL pipelines using PySpark, Databricks, and AWS cloud services for large-scale structured and semi-structured datasets. Worked on real-time and batch data processing using Spark Structured Streaming, Hive, Athena, and Kinesis. Implemented schema validation, incremental loading, partition optimization, and analytics-ready data transformations.

SKILLS

Programming Languages : Python, SQL, C, C++

Data Engineering & Big Data : PySpark, Apache Spark, ETL Pipelines, Delta Lake, Databricks, Hadoop, Hive, Spark Structured Streaming

Machine Learning & Analytics : Machine Learning, Pandas, NumPy, Scikit-learn, Data Preprocessing, Data Analysis

Cloud & Visualization : AWS (S3, EMR, Athena, Glue, Lambda, SNS, SQS, Kinesis), QuickSight, Google Cloud

Databases & Tools : MySQL, MongoDB, Data Warehousing, Git, GitHub, Jupyter Notebook

PROJECTS

Zomato ETL Pipeline on Databricks

Tech: PySpark, Databricks, Delta Lake, Spark SQL

Built a scalable ETL pipeline using Medallion Architecture for processing semi-structured restaurant datasets. Implemented incremental loading, schema enforcement, deduplication, and partition optimization for analytics-ready reporting.

Pharmaceutical Supply Chain Streaming Analytics Platform

Tech: Kinesis, Spark Structured Streaming, Hive, Athena, Sqoop

Built a real-time streaming analytics platform for pharmaceutical cold-chain and inventory monitoring. Implemented batch and streaming ETL pipelines for compliance analytics, batch traceability, and recall impact analysis.

Recruitment Platform Development

Tech: SQL, MongoDB, React, Node.js

Designed database workflows and analytics pipelines for recruiter-candidate interactions. Applied data cleaning and anomaly detection techniques to improve platform data quality and monitoring.

EDUCATION

Symbiosis Institute of Technology : B.Tech — Computer Science & Engineering (AI/ML) CGPA: 8.1.

CERTIFICATIONS

- ServiceNow Certified Application Developer (CAD)
- ServiceNow Certified System Administrator (CSA)
- AWS Academy Cloud Foundations
